

Yogendra Singh

Full Stack Developer | DSA with Java | React.js | MERN Stack

Chandigarh, Sector-45, Burail, H.No.- 2018

+91 9456311336 | [Email](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full-Stack Web Developer with hands-on experience building responsive web applications using React.js, Node.js, and Express.js. Comfortable with the complete MERN workflow, including MongoDB data modeling, REST API design, and JWT-based authentication. Strong foundation in Data Structures & Algorithms with Java. Currently deepening hands-on DevOps skills — Linux, Docker, and AWS EC2 — through a personal project deployment.

Technical Skills

Programming Languages: Java, JavaScript, Python

Web Technologies: HTML5, CSS3, React.js, Tailwind CSS, Vite

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, Cloudinary (media storage)

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), Vercel, VS Code, Postman

Currently Learning: Linux, Docker, AWS EC2, nginx

Projects & Experience

Student Accommodation Platform ([live link](#)) | ([GitHub link](#))

Full-Stack Project

React.js, Node.js, Express.js, MongoDB

- Built a full-stack platform to streamline accommodation discovery and management for university students.
- Designed a RESTful API backend with Node.js and Express.js, backed by MongoDB for data storage.
- Implemented user authentication, property listings, and search/filter features end to end.

WordCatch — Vocabulary Builder Extension ([live API](#)) | ([GitHub link](#))

Full-Stack Project

Chrome Extension (Manifest V3), JavaScript, Node.js, Express.js, MongoDB

- Built a Chrome extension (Manifest V3) that looks up and saves word definitions on double-click, using a Content Script, Service Worker, and Popup architecture.
- Developed an Express REST API with JWT authentication and bcrypt password hashing, backed by MongoDB.
- Added a caching layer for dictionary lookups to reduce redundant API calls and improve response time.
- Wrote unit and integration tests with Jest and mongodb-memory-server; using this project to practice Docker, nginx, and AWS EC2 deployment as part of ongoing DevOps learning.

Portfolio Website ([live link](#)) | ([GitHub link](#))

Personal Project

Next.js, Tailwind CSS, Groq API, Vercel

- Built a fully responsive personal portfolio, achieving consistent rendering across device breakpoints.
- Integrated an AI chatbot using the Groq API to answer visitor questions about my background and work.
- Deployed on Vercel with CI/CD via GitHub, enabling zero-downtime updates on every commit.

Utility Tool Box ([live link](#)) | ([GitHub link](#))

Personal Project

Next.js, React.js, Tailwind CSS, Vercel

- Built a modular utility web app with reusable React components to reduce duplicate code.
- Designed a clean, responsive UI with Tailwind CSS across mobile and desktop.

Education

Master of Computer Applications (MCA)

2024 - 2026

Hemwati Nandan Bahuguna Garhwal University

Bachelor of Science (B.Sc) — Physics, Mathematics, Information Technology

2021 - 2024

Soban Singh Jeena Campus, Almora

Class XII — 85.2%

2021

Class X — 82.6%

2019

Certifications

GitHub Foundations — Issued by GitHub/Microsoft

July 2026
